## Dear Valued Customer,

Hello, and thank you for your recent request for information regarding diversifying your retirement savings with physical gold and silver.

You're probably just as concerned as we are for America's economic future. For the first time in our proud nation's history, we're facing a future where our standard of living will decline compared to those who came before us. Our two-decade-plus national binge of deficit spending and multiple bubble-and-bust cycles of the stock market has created a financial dilemma for Americans who hope, one day, to stop working and enjoy their golden years.

The U.S. faces an absolute ocean of red ink, over \$30 trillion (and counting). That's money owed to global central banks, U.S. citizens, and future recipients of Social Security, just to name a few. We've seen the federal government bailout banks owned by other nations. We've seen the Federal Reserve conjure trillions of brand-new dollars out of thin air, nearly overnight! It's only a matter of time before the entire house of cards comes tumbling down before our government becomes financially bankrupt, dooming all our futures, and our children's futures as well.

We have a window of opportunity right now. To diversify our hard-earned money out of the inflated, increasingly-worthless U.S. dollar. To turn those pieces of paper, backed by nothing but hot air and vague promises to pay with real, physical assets we can hold in our hands.

My colleagues and I at American Alternative Assets have been working hard to educate everyday Americans just like you about the crucial importance of acquiring physical precious metals due to their intrinsic value. We want you to know the benefits of acquiring rare, highly-valued U.S. coins to diversify and protect your savings. I'm confident that, if you're given the facts, you will make the right decision. You will proudly join millions of your fellow Americans who own rare coins and precious metals.

Please take as much time as you need to review the enclosed materials. I know it's a lot to take in! And remember, at any time, my staff of professionals stands ready to make your experience enjoyable. We want to offer you the same level of white-glove service the world's billionaires get when they go shopping - while never losing sight of the critical protection that tangible items with intrinsic value can give your financial future.

If I can personally be of any additional service to you or your family, please give my office a call at +1 888 820 6316. You have my commitment that our organization will make every effort to serve your needs with integrity and honesty.

Sincerely,

**CEO, American Alternative Assets**

# THE DIFFERENCE WE ARE MAKING

*“Gold is money. Everything else is credit.”*

—J.P. Morgan

The core of our company is directed at providing great opportunities for Americans to protect and diversify their retirement funds through physical precious metals. We provide valuable knowledge and every of our company’s decisions is tailored towards ensuring a smooth transition to your retirement plan.

## Our Mission

Our mission is to provide the best service through value of integrity, support, and knowledge to empower customers in making financially prudent decisions to attain their desired financial future and protect their savings.

## Our Values

We achieve this mission through values of hard work, customer centeredness, integrity, empathy, and efficiency. We support our customers through the whole process to enable them to understand all the available options for purchasing precious metals and guide them in choosing one that is best suited for their goals.

## Our Vision

To establish a network of financially secured American retirees through sustainable ownership of physical assets.

# HERE'S WHY WE ARE THE BEST

American Alternative Assets stands as the best in industry as we offer a time-proven track record of success in our service provision. We have a profile that projects values of integrity, empathy, and hard work dedicated to helping customers meet their needs.

## Simplicity

Our process is simple, easy to understand, and execute. Our customers trust us to make their retirement plans straightforward; hassle-free.

## Transparency

We understand the value of integrity and pride ourselves in being open with our customers. We build and sustain trust through an entirely transparent process. From the point of contact to the delivery of your metals, you can count on our fair and trustworthy service.

## Reliability

You can count on us to help you make the best choices. Through every step of the process, from lower prices to insured delivery we are always client-oriented. We have a track record of reliable customer service, something you can count on when safeguarding your future.

***The benefits of choosing us are innumerable. We have set a standard in the industry that remains to be matched.***

***Our mission, vision, and values drive us to give customers the best value when making their retirement plans. Our service aims to establish trust- and to do it in the most honorable manner.***

# DIVERSIFICATION CAN SERVE AS A **SAFEGUARD** AGAINST ECONOMIC UNCERTAINTY

Nobel Prize-winning economist Harry Markowitz once described diversification, the practice of putting your nest egg in different baskets, as **“the only free lunch”** in investing. Why?

Well, in investing, risk and return are joined at the hip. It's rarely possible to add potential return on investment without taking on a corresponding risk of loss. But diversification across different types of assets can boost returns AND reduce risk. This sounds too good to be true, so we'll just quote the Securities and Exchange Commission website here:

The Magic of Diversification. The practice of spreading money among different investments to reduce risk is known as diversification. By picking the right group of investments, you may be able to limit your losses and reduce the fluctuations of investment returns without sacrificing too much potential gain. Diversification can be across different types of assets (stocks and bonds), across different regions (the U.S. and international), and different asset classes (physical precious metals and equities). Diversification's benefits are very well-studied in financial and academic research, and they're the underpinning of Modern Portfolio Theory (MPT). We don't have the space to explore them fully, beyond one key consideration...

# TODAY'S ECONOMIC AND GLOBAL CHALLENGES POSE UNPRECEDENTED RISKS

Listen, we're not trying to scare you. We just want to make sure you're ready for what's coming, and it looks like you want to be prepared too, since you're reading this. Right now, things like high inflation, worries about a recession, and unpredictable investment markets are making it super important to make smart choices about your money. Times are tough, and being smart with your finances is key to keeping your money safe.

***“We live in unprecedented times and we’re facing unprecedented threats.”***

\_Mark C. Sprenger

## Inflation

The United States has recently seen a moderation in inflation rates, dropping to 3.24%, yet still above the Federal Reserve's 2% target. Prices are not decreasing; they are merely increasing at a slower rate than previously. For instance, based on the Consumer Price Index (CPI), prices have risen 9.7% since January 2026.

However, the CPI is often criticized for understating the actual rate of inflation. Amid concerns of a potential recession, some economists are cautioning that 2026 could face a major financial crash, attributing this to the \$27 trillion in artificial economic stimulus injected since 2009 over a 15-year period.

## Government Debt & Deficit Spending

The public debt of the United States has risen to approximately 33.7 trillion U.S. dollars, which is a substantial increase from the previous year's figure of around 30.93 trillion U.S. dollars. This debt has been largely incurred in an effort to finance the economy and sustain growth, particularly in response to various economic challenges.

## Stock Market

The stock market, often unpredictable and volatile, can at times resemble a casino where fortunes are risked and sometimes lost. Its inherent unpredictability makes it a high-risk option for investing savings. Factors influencing the market are largely outside an individual investor's control, and the possibility of a crash, even during periods of apparent high returns, is an ever-present reality.

Below is a review of some notable stock market crashes throughout history.

### Dot-com bubble (2000)

During the 1990s, the internet boom propelled the stock market to extraordinary, unsustainable levels, with a frenzy of investment from both individual investors and venture capitalists. As the capital influx waned, panic set in, prompting a rapid sell-off that triggered one of the most severe market crashes in modern history.

### The Great Recession (2007-2008)

The 2007-2008 mortgage crisis, a sudden and devastating event, stemmed from the collapse of the housing market due to rising Federal Reserve rates. This collapse triggered a widespread liquidation of mortgage-backed securities, culminating in bankruptcy declarations from major financial institutions.

### Covid-19 Meltdown (2020)

As the coronavirus pandemic struck in early 2020, it spurred a frantic and massive sell-off in the stock market. From February to March, the Dow Jones Industrial Average nosedived by an alarming 39%, reflecting intense economic turmoil across numerous sectors.

## Cryptocurrency

Cryptocurrency, often considered the most volatile asset class, has seen erratic market movements, attracting investors with its potential for high returns but also leading to significant losses during crashes. The sector's stability remains a concern, particularly due to its links to illegal activities and the fallout from high-profile incidents like the FTX collapse. These developments highlight the intricate and unpredictable landscape of cryptocurrency trading.

## Geopolitical Tensions

The escalating geopolitical tensions, including the Russia-Ukraine conflict, strained U.S.-China relations, and the Israel-Hamas conflict, are not only political challenges but also key drivers of economic and financial uncertainties worldwide. China's increasingly assertive role on the global stage and the UN's difficulties in addressing these issues further contribute to a volatile economic environment, impacting markets and international trade.

# PHYSICAL PRECIOUS METALS OFFER CATASTROPHIC INSURANCE

***“There can be no other criterion, no other standard than gold. Yes, gold which never changes, which can be shaped into ingots, bars, coins, which has no nationality, and which is eternally and universally accepted as the unalterable fiduciary value par excellence.”***

- Charles de Gaulle

Gold and silver have long been recognized for their enduring value, especially during times of economic instability.

Historically, gold has been a symbol of wealth and stability. The first gold coins, dating back to around 600 BCE, were the Lydian staters, made from a natural gold and silver mix called electrum. Major ancient civilizations like Greece, Rome, Egypt, and China all valued gold and used it in their currencies. Similarly, silver has a rich history in economics and commerce, being used as currency since at least 1,200 BCE, and its value was evident even earlier, around 3500 BCE, in Anatolia.

Both metals are known for their resilience and ability to retain value through economic downturns, making them reliable stores of value. This quality sets them apart from other forms of investment, especially during economic hardships.

Starting in 2023, this significance was highlighted when central banks around the world acquired a record metric tons of gold. This move was a clear indicator of a global trend towards these precious metals as a strategic defense against economic volatility and uncertainty.

# GOLD

***“Gold is money.  
Everything else is credit.”***

**- Mark C. Sprenger**

Gold's reputation as the “King of precious metals” precedes it. With thousands of years in history, its value has stood the test of time.

## **CENTRAL BANKS' RECORD PURCHASE: METRIC TONS OF GOLD ACQUIRED IN 2026**

In 2026, central banks globally acquired a record metric tons of gold, a move indicating deep insights into future economic trends. This massive purchase is a key signal for individual investors considering gold for diversification, suggesting that these banks foresee scenarios where gold's stability and value are paramount. Their actions hint at potential economic uncertainties not widely recognized, underscoring gold's role as a strategic asset in uncertain times.

## **“MONEY OF LAST RESORT”**

Gold, often deemed the ultimate financial safe haven, becomes increasingly crucial as market volatility and inflation escalate. In tumultuous times, when investor panic often leads to widespread selloffs and inflation erodes the dollar's purchasing power, gold's value typically holds steady or even appreciates.

This resilience makes gold a critical hedge during periods of economic downturns, ensuring that wealth is not only preserved but also has the potential to grow. As such, gold stands as a vital asset for protecting and potentially enhancing your financial security in the face of economic uncertainty and market instability.

# WHY DO CENTRAL BANKS OWN GOLD?

In 2026, central banks worldwide significantly impacted the financial world by accumulating an impressive 800 tons of gold. This substantial acquisition underscores gold's critical role amidst economic uncertainties and indicates a major strategy shift by key financial institutions.

This development is particularly relevant for individuals looking to diversify with gold, as it reflects central banks' expectations of potential economic challenges and their commitment to safeguarding their national currencies against potential crises. Their collective move towards gold highlights its value as a stable asset and a hedge against the fluctuating worth of fiat currencies.

Central banks hold gold in their reserves for several key reasons, which are vital to consider for anyone looking to invest in gold:

## Inflation Protection

Gold offers protection from inflation and serves as a long-term store of value. Unlike fiat currencies, which can lose value due to inflation, gold typically sees an increase in demand during such periods.

## Balance Reserves

Central banks use gold to keep their foreign exchange reserves balanced, aligning their holdings with geopolitical and economic concerns.

## Stability in Crisis

Gold is used as a stabilizing factor for the economy as currencies face devaluation. Major countries of the world use gold in defending from the excesses and fluctuation that threaten economic growth.

Central banks hold gold to back their national currencies, showcasing financial stability to the world. They actively trade gold to influence their currency's perceived value

Lowering a currency's value can be strategic, as it makes a nation's exports more affordable to international buyers, boosting trade.

However, a weaker currency can also lead to higher import costs, impacting domestic consumers with increased prices for imported goods. This delicate balance reflects the complex role of gold in global economic strategies.

# Geopolitics and central banks could keep gold demand hot in 2024, World Gold Council says

PUBLISHED FRI, DEC 8 2023 4:49 AM EST

Elliot Smith @ELLIOTSMITHCNBC

SHARE f t in e

### KEY POINTS

- The two most significant events for gold demand in 2023 were the collapse of Silicon Valley Bank and the Hamas attack on Israel, the WGC said, estimating that geopolitics added between 3% and 6% to gold's performance over the year.
- The WGC estimated that central bank demand added 10% or more to gold's performance in 2023, and said even if 2024 does not reach the same heights, above-trend buying should still offer an extra boost to gold prices.
- The yellow metal broke through \$2,100 per ounce on Monday before moderating slightly, and spot prices were hovering at around \$2,030 per ounce early Friday.

# SILVER – POISED FOR A “EXPLOSIVE MOVE” IN 2026

Along with U.S. gold coins, we also recommend U.S. silver coins, because of their widespread public circulation throughout American history until 1964. In 1964, the U.S. Mint abruptly stopped minting coins with silver content.

Like gold coins, U.S. silver coins are categorized as bullion silver coins, general numismatic/collectible silver coins, and rare U.S. silver coins. Bullion and general coins derive their value primarily from the daily spot price of silver, while rare silver coins may have added value based on their scarcity, condition, popularity, and collector interest.

## “MONEY OF LAST RESORT”

Along with U.S. gold coins, we also recommend U.S. silver coins, because of their widespread public circulation throughout American history until 1964. In 1964, the U.S. Mint abruptly stopped minting coins with silver content.

This trend is mirrored in China, where the government actively promotes the acquisition of gold and silver among citizens. The 2026 surge in silver prices, driven by anticipated Federal Reserve rate cuts and the global push for green energy, underscores silver's appeal.

With central banks also increasing their gold reserves to diversify away from the U.S. dollar, silver's potential for an 'explosive move' in 2026, especially in the context of limited global supply, further highlights its significance as an investment option. This landscape suggests a strategic opportunity for investors to consider silver in their portfolios.

### Industrial Demand

Silver's extensive use in various industrial applications, especially in areas like photovoltaics for solar panels, consumer electronics, and 5G technology, boosts its demand

### Global Supply Constraints

Limited global silver supply, with demand often outpacing available resources, can lead to increased prices, particularly if this trend continues over time.

### Investment And Monetary Policies

Shifts in monetary policies, such as interest rate cuts by central banks, can influence silver prices. Investors often turn to silver as a hedge against currency devaluation and inflation.

# DIVERSIFICATION STRATEGIES: MITIGATE YOUR RISKS IMMEDIATELY

## DIVERSIFICATION IS A WAY TO PROTECT YOUR HARD-EARNED NEST EGG

It's crucial to understand hedging before diving into portfolio diversification. Hedging, which involves investing in various asset types to mitigate risks, is an urgent need in today's unpredictable market. For example, adding gold to a portfolio with stocks, bonds, and real estate can be a critical move to counterbalance potential losses.

Equally urgent is considering your retirement accounts, like 401(k)s and IRAs, as part of your diversification plan. These accounts are directly impacted by market fluctuations, and their inclusion in your strategy is essential for long-term security. They offer varied risk levels and are key to a robust financial future.

Lastly, diversifying into precious metals like gold, silver, platinum, and palladium is more than just a wise choice; it's a crucial defense against the instability in other investment areas. Allocating 5%-20% of your portfolio to these metals is a commonly recommended strategy. This approach is not just advisable; it's a protective measure for your investments against the unpredictable economic landscape.

## GOLD ETFs: NOT ALL THAT GLITTERS IS GOLD

It's important to understand that gold ETFs are fundamentally different from investing in physical gold. When you invest in a gold ETF, you're essentially buying a paper representation linked to the value of gold, but the actual gold is held elsewhere, not in your possession.

What's critical to note is the tax implications. The government taxes gold ETFs as "collectibles," which can lead to higher tax rates compared to regular stocks. This means you could end up paying more in taxes, despite not owning any physical gold. Given these factors, experts often caution against assuming gold ETFs provide the same benefits as owning real gold.

While they may seem like a convenient way to invest in gold, the higher tax burden and lack of tangible asset ownership make gold ETFs a less favorable option for those seeking the security and potential tax advantages of physical gold.

# PAPER GOLD

Gold ETFs operating as trusts have a straightforward setup. In these trusts, physical gold is held and shares are distributed to investors. As an investor, you gain fractional ownership of the gold. The share values closely track the real-time price movements of gold, usually equating to around 1/10th or 1/100th of the actual gold price.

Here are a few things you should know before you invest your hard-earned money into any sort of fund.

## YOU DON'T OWN PHYSICAL GOLD

Some financial products are not backed by physical assets but are merely contracts based on the spot price of gold. While you might envision large vaults stacked with shiny gold bars, your investment could essentially be just a bet on the fluctuations in gold prices.

## FUNDS FACE MARKET MANIPULATION

In our financial markets, every asset, from stocks to bonds, is susceptible to price manipulation by speculators. Techniques like short sales and derivatives can significantly influence an asset's value, often overshadowing the worth of the underlying asset itself.

## ETF FEES

When you invest in a gold ETF, you don't actually own physical gold. Gold ETFs continuously accrue charges throughout the investment's life, including marketing and management fees. Additionally, when you sell your gold ETF, it's taxed by the government as a taxable event, which can undermine the investment's purpose.

The longer you hold a gold ETF, the more you lose compared to owning physical gold.

## COUNTERPARTY RISK

Investing in paper gold, such as gold ETFs, introduces additional counterparty risk. There's a chance that the gold ETF company might go bankrupt or not fulfill its commitments. Moreover, complications like tracking costs and errors often arise due to the involvement of third parties in these investments.

# ADDRESSING COMMON CONCERNS

At American Alternative Assets, our approach is grounded in simplicity and transparency, with a strong emphasis on integrity. To uphold this commitment, we've gathered a list of frequently asked questions and common concerns to guide you effectively:

## What Are the Risks of a Gold IRA?

While investing in a Gold IRA offers unique opportunities, it also involves navigating market fluctuations and liquidity challenges, alongside considering the necessary expenses for secure storage and insurance.

## Can I Transfer Existing Retirement Funds into a Gold IRA?

Yes, you can transfer existing retirement funds into a Gold IRA. This process typically involves a rollover or transfer from your current retirement accounts, such as a 401(k) or traditional IRA, into a Gold IRA under IRS guidelines.

## Why Might a Financial Advisor Be Against Gold IRAs?

Financial advisors often don't receive commissions on these investments, which can influence their recommendations towards other investment options that offer them compensation.

## How to Address Concerns from Family About Investing in a Gold IRA?

To address concerns from family about investing in a Gold IRA, it's important to have an open and honest conversation with them, explaining the potential benefits and risks associated with this investment choice.

## Are There Tax Implications for Gold IRAs?

Gold IRAs share tax rules with traditional IRAs, deferring gains until retirement withdrawals. When rolling over traditional IRA or 401(k) funds into a Gold IRA, immediate tax consequences are typically avoided, preserving tax-deferred retirement savings.

# WHY **BROKERS AND INVESTMENT BANKS HATE GOLD IRAS**

It's unusual to observe the antipathy that Wall Street harbors towards gold. Even though gold holds value as a hedge against inflation and as a prudent IRA store, most stockbrokers and investment bankers tend to hold a disdain for it. These reasons are evident, and comprehending the underlying psychology is crucial in safeguarding yourself from this bias.

## **They Believe It Holds No Value**

Investors like Warren Buffet have been known to keep a fixed stance on Gold as having no value. The sentiment is common among investing establishments. However, this is far from the truth. Civilizations have hemmed in on Gold primarily because of its intrinsic value. This value has been important in protecting nations from the harsh reality of inflation.

## **They Have Been Trained To Do So**

American financial institutions have been primed since the Nixon policy to downplay gold's importance and relevance. This was due to gold being seen as a threat to fiat currency and as such have been trained to have a disdain for gold.

## **Storage Process**

The fast-paced processes involved in more volatile assets have attuned brokers and investment bankers to more paper assets – Exactly why they have no problem with gold ETFs.

The brokers want nothing to do with the risk and cost of protecting physical assets like gold.

## **You Get To Manage It Yourself**

The process of acquiring and managing a Gold IRA can be done by yourself eliminating the need for a third party. This eliminates the broker fee or recurrent fees on your equities and the brokers know this. Also, your asset is away from the manipulations and fluctuations that are sometimes the effect of big brokers and investment bankers.

## **Fixation On Excess Gains**

The typical stockbroker believes Gold IRA is not a good investment as it offers no dividend and doesn't give the super high returns seen among volatile holdings such as stocks and cryptocurrency.

This mentality on Wall Street is driven by greed without the consideration of the investor. The current loss and sell-out seen so far in the equity market continue to prove them wrong and show why Gold IRAs are a great option plan for you.

# HOW DOES A **GOLD IRA WORK?**

A gold IRA or self-directed IRA operates like any other retirement account. Your retirement fund is saved in physical assets of gold such as coins, bars, or bullion. A gold IRA can be set up with pretax or after-tax money and must be held separately from normal IRAs. Remember you can hold equities and bonds in your self-directed IRA, but now you get to include precious metals as well.

## **Traditional Gold Ira**

They work on a tax-deferred basis like the traditional IRA. They are funded with pretax dollars and taxes are removed when you claim your withdrawal at retirement.

## **Roth Gold Ira**

A Roth IRA works on an after-tax basis. They are funded with after-tax money and you won't be paying taxes when you claim your withdrawal at retirement.

## **Sep Gold Ira**

Business owners and self-employed individuals have this option that is similar to a traditional Gold IRA available to them.

## **DECISIVE ACTION: NEXT STEPS**

You can find your 401(k) and IRAs through financial institutions or online investment platforms. To locate your 401(k), contact your employer's HR department or the plan administrator. For IRAs, get in touch with the financial institution where you opened the account. Remember to keep track of your retirement accounts and consider using tools like BEAGLE to find old 401Ks/IRAs.

### **GIVE US A CALL**

**One of our expert specialists will walk you through the entire process, hand holding the entire way.**

**Please give us a call at +1 888 820 6316, Monday-Friday, between 7am -4pm (PST).**

# SETTING UP YOUR ACCOUNT

American Alternative Assets helps you through the process of setting up your account.

Our representatives work you through the process involved in creating your gold IRA account and guide you in making an informed choice on all available physical assets.

Schedule your free consultation with one of our Senior Portfolio Managers or contact us today.

## FUND YOUR ACCOUNT

Once your account is created you can roll over your funds through an IRA-to-IRA transfer, rollover from an existing 401k or cash contribution to a self-directed custodian.

01

## SELECT A DEPOSITORY

02

To complete the process, you must find a secured depository to store your gold. IRS law requires that funds in a gold IRA be stored in a depository. Depositories are specialized safe houses where all your precious metals will be stored and are insured against loss, theft, and other events.

# HERE'S WHY WE **ARE THE BEST**

American Alternative Assets is renowned for its exceptional industry standing, underscored by a consistently successful track record. Our services are anchored in core values of integrity, empathy, and relentless dedication to hard work, all aimed at comprehensively meeting our customers' diverse needs.

## **Simplicity**

Our process is streamlined, intuitive, and effortless to implement, earning us the trust of our customers who rely on us to simplify their retirement planning, ensuring a smooth and hassle-free experience.

## **Transparency**

We are deeply committed to upholding integrity, and we take immense pride in maintaining complete transparency with our customers. Our trust-building approach is evident in every step of our process, from the initial contact to the final delivery of your metals. You can always rely on our services to be fair, honest, and utterly trustworthy.

## **Reliability**

Rely on us to guide you towards the optimal choices for your needs. At every phase, from offering competitive prices to ensuring insured delivery, our focus remains steadfastly client-centric. Our history is marked by dependable customer service, a cornerstone you can trust as you secure your future with us.

“ American Alternative Assets has A+ BBB rating, affiliations with Ethics.net and Business Consumer Alliance, and an impressive 94% 4.4 -star rating on Trustpilot.

# TESTIMONIALS

## **Great Experience**

*Working with Michael and Randy was a great experience. They are extremely knowledgeable about precious metals and are interested in you as a person, not just a target. I would recommend them to anyone considering diversifying their assets.*

*\_Timothy P.*

## **I thank God I found AAA and pulled my...**

*I thank God I found AAA and pulled my IRA out of the stock market and into a precious metals investment. Mark & Randy are superb! What a blessing! They have made my investment transitions so easy. Their professionalism, experience & willingness to explain & answer all my questions has gone far & above any financial advisors I have ever dealt with in the past. I highly recommend them to everyone! Triple thumbs up!!!*
