## Dear Valued Customer,

Hello, and thank you for your recent request for information regarding diversifying your retirement savings with physical gold and silver.

You're probably just as concerned as we are for America's economic future. For the first time in our proud nation's history, we're facing a future where our standard of living will decline compared to those who came before us. Our two-decade-plus national binge of deficit spending and multiple bubble-and-bust cycles of the stock market has created a financial dilemma for Americans who hope, one day, to stop working and enjoy their golden years.

The U.S. faces an absolute ocean of red ink, over \$30 trillion (and counting). That's money owed to global central banks, U.S. citizens, and future recipients of Social Security, just to name a few. We've seen the federal government bailout banks owned by other nations. We've seen the Federal Reserve conjure trillions of brand-new dollars out of thin air, nearly overnight! It's only a matter of time before the entire house of cards comes tumbling down before our government becomes financially bankrupt, dooming all our futures, and our children's futures as well.

We have a window of opportunity right now. To diversify our hard-earned money out of the inflated, increasingly-worthless U.S. dollar. To turn those pieces of paper, backed by nothing but hot air and vague promises to pay with real, physical assets we can hold in our hands.

My colleagues and I at American Alternative Assets have been working hard to educate everyday Americans just like you about the crucial importance of acquiring physical precious metals due to their intrinsic value. We want you to know the benefits of acquiring rare, highly-valued U.S. coins to diversify and protect your savings. I'm confident that, if you're given the facts, you will make the right decision. You will proudly join millions of your fellow Americans who own rare coins and precious metals.

Please take as much time as you need to review the enclosed materials. I know it's a lot to take in! And remember, at any time, my staff of professionals stands ready to make your experience enjoyable. We want to offer you the same level of white-glove service the world's billionaires get when they go shopping - while never losing sight of the critical protection that tangible items with intrinsic value can give your financial future.

If I can personally be of any additional service to you or your family, please give my office a call at (833) 656-4653. You have my commitment that our organization will make every effort to serve your needs with integrity and honesty.

Sincerely,  
Shanon Davis

**CEO, American Alternative Assets**

# **INTRODUCTION:** **THE HIDDEN INDICATORS THEY DON'T WANT YOU TO SEE**

Right now, seven economic warning signals are flashing red simultaneously for the first time since 2007.

These aren't the indicators you'll hear about on CNBC. Your financial advisor doesn't track them. The Federal Reserve hopes you never discover them.

Investment banks pay millions to track these "**Bellweather Indicators.**" Hedge funds build entire strategies around them. The ultra-wealthy use them to move to safety before the masses realize there's danger.

Today, you're getting access to all seven.

We're at a critical inflection point. Four signals have already triggered. The remaining three are on the verge. History shows when all seven align, you have 12-18 months before economic catastrophe strikes.

That window opened three months ago.

## **CHAPTER 1: THE VEGAS COLLAPSE**

### **SIGNAL**

Las Vegas visitor numbers are plummeting **11.3%** year-over-year. The steepest decline since 2008. Why does this matter to your retirement account?

Vegas is America's discretionary spending canary in the coal mine. When Americans feel financially secure, they visit Vegas. When they're worried, they stay home. No government manipulation, no statistical tricks—**just pure consumer sentiment.**

**In January 2007**, while stocks hit all-time highs, Vegas visitors dropped **2.2%**. The experts called it a blip. Eighteen months later, Lehman Brothers collapsed and retirement accounts lost **40-70%** of their value.

**Today's numbers are far worse than 2007:**

- Hotel occupancy crashed 17%
- Gaming revenue down 3.9%
- International visitors dropped 13.2%

When Vegas numbers fall below negative 5%, recession follows within 18 months. Every single time since the 1950s.

We're at negative 11.3%.

## CHAPTER 2: THE SHIPPING SHOCKWAVE

UPS handles **6%** of America's GDP. Their package volume is an economic X-ray that can't be faked.

Last quarter, UPS volume plummeted **10.8%**. They're cutting 20,000 jobs and withdrew their 2025 guidance entirely. Companies only do this when they have no idea how bad things will get. The last time we saw these numbers? September 2008, one month before the crash.

FedEx shows identical collapse patterns. Even Amazon's third-party shipping dropped **23%** while returns jumped **31%**. Americans are buying less, returning more, and desperately using "**buy now, pay later**" for basic purchases.

## CHAPTER 3: THE LUXURY COLLAPSE INDICATOR

RV sales just crashed **50.4%**. Boat sales down 31%. Motorcycle sales off 28%.

When Americans stop buying recreational vehicles, it's not about being frugal—it's about battenning down for the storm they see coming. These purchases are the first thing cut when people sense economic danger.

Ball State University economist Michael Hicks, who correctly called 2008, just warned: "**This is a very strong signal we're moving into recession.**"

The truly alarming part? Luxury motorhome sales (Class A) have plummeted 20% year-over-year.

These are the RVs that wealthy Americans buy when they're confident about the future. The dramatic pullback in this segment shows that even the affluent are battenning down the hatches for what they see coming.

## CHAPTER 4: THE CARDBOARD BOX RECESSION

Everything ships in a box. Every Amazon order, every industrial component, every retail product.

Cardboard production is the ultimate economic truth detector. You can manipulate GDP numbers, but you can't fake the need for boxes.

## The pattern is chilling:

- 1929: Box production fell 12% before Black Tuesday
- 2008: Cardboard shipments dropped 8.1% before Bear Stearns
- Today: Box shipments crashed 8.4%

When box demand falls during the holiday shopping season, something is catastrophically wrong.

# CHAPTER 5: THE UNDERGROUND INDICATORS

Now we enter the bizarre—indicators so strange most people laugh until they learn these have never been wrong.

**The Men's Underwear Index:** Alan Greenspan tracked this religiously. Men skip new underwear first when money gets tight. Sales just crashed 23%, the worst since 1932.

**The R-Word Index:** Media mentions of "recession" predict downturns. Over 1,000 mentions signals imminent recession. Last quarter: 1,847 mentions—highest since Q3 2008.

**The Skyscraper Curse:** Record-breaking buildings predict crashes. Empire State (1931) = Depression. Burj Khalifa (2010) = 2008 aftermath. Four record skyscrapers complete in 2025.

## Current Status:

- Vegas Signal: **RED**
- Shipping Indicator: **RED**
- Luxury Goods: **RED**
- Cardboard Index: **RED**
- Underwear Index: **WARNING**
- R-Word Count: **WARNING**
- Skyscraper Curse: **IMMINENT**

# CHAPTER 6: WHY 2025 WILL BE WORSE THAN 2008

**Consumer confidence just hit Depression-era lows** when adjusted for inflation. Credit card delinquencies doubled since 2022. Auto loan defaults match 2008 levels, and this is happening while people still have jobs.

The Federal Reserve is trapped. Raise rates and markets crash. Lower rates and inflation explodes. Do nothing and both happen anyway.

**Meanwhile**, the government prepares to launch Central Bank Digital Currency (CBDC), enabling them to track every transaction, freeze accounts instantly, and force negative interest rates.

The window to protect your wealth in physical assets is closing fast.

# CHAPTER 7: THE GOLD SHIELD STRATEGY

There's one asset that thrives during economic chaos: physical gold.

**Historical proof is undeniable:**

During 1970s stagflation, stocks lost 92% of value (inflation-adjusted) while gold gained 2,300%.

In 2008, stocks crashed 55% while gold gained 31%.

From 2020–2024, gold outperformed stocks by 24%.

Central banks just bought 1,000 tons of gold—the most in history. China added 225 tons. Russia 190 tons. India 156 tons. They're abandoning their own currencies.

You can legally move your IRA or 401(k) into physical gold and silver through a Precious Metals IRA. No taxes, no penalties, complete protection from what's coming.

# CONCLUSION: THE CHOICE IS YOURS

Seven warning signals, all flashing red simultaneously. Central banks hoarding gold at record levels. The wealthy quietly moving to safety.

But here's what makes this moment different from every other "**crisis**" you've heard about: **The solution has already proven itself.**

## WHY GOLD IS THE ANSWER RIGHT NOW

Think about what you've just learned. While Las Vegas tourism collapses and shipping volumes plummet, central banks, the very institutions that PRINT money, are desperately buying physical gold. Over 1,000 tons for three straight years. China, Russia, India, Poland. They're all racing to convert their paper currencies into real, tangible gold.

**Ask yourself:** Why would the people who control the money supply be trading it for gold? Because they know what's coming. And they know what has **ALWAYS** worked.

During the 1970s stagflation, the last time we saw conditions similar to today, stocks lost 92% of their value when adjusted for inflation.

**Gold gained 2,300%.** That's not preservation of wealth. That's multiplication of wealth during chaos.

In 2008, while your neighbors watched their 401(k)s evaporate, gold holders saw gains of 31%. And that crisis was nothing compared to what these seven indicators are warning us about now.

## THE MATHEMATICAL CASE FOR GOLD

This isn't about fear. It's about math.

If you have **\$300,000** in retirement savings and we see another 2008-style crash, you could lose **\$150,000** or more.

But if you protect even **20%** of your portfolio with gold, just **\$60,000**, history shows that portion could double or triple while everything else burns.

That **\$60,000** in gold could become **\$120,000 to \$180,000**, offsetting your losses and potentially leaving you ahead.

Meanwhile, every day the Federal Reserve prints more money, every dollar in your savings account becomes worth less. Gold can't be printed. It can't be created with a keystroke. It can't be devalued by politicians.

## YOUR WINDOW IS CLOSING

You've worked 40 years for this money. You've sacrificed, saved, and planned. Now, in the next 90 days, you face the most important financial decision of your life.

You can hope that this time is different. That somehow these seven indicators are wrong. That the central banks are mistaken. That history won't repeat.

Or you can take the same action that has protected wealth for 5,000 years.

## THE SIMPLE TRUTH

Gold isn't just an investment. It's insurance you can't afford not to have. And unlike your homeowner's insurance or car insurance, gold insurance has historically paid you handsomely for owning it.

The seven Bellweather Signals are screaming their warning. Central banks are taking action. The wealthy have already moved.

**The only question remaining is: *Will you protect what you've worked a lifetime to build?***

Call Today, American Alternative Assets at

**(833) 656-4653**

In 30 minutes, you'll understand exactly how to shield your retirement from what's coming. **Free consultation. No obligation.** Just the truth about your options while you still have them.

**Tomorrow, gold will be more expensive.** The window will be smaller. And the seven signals will be one day closer to triggering the crisis they're warning about.

Don't be a victim of normalcy bias. Be one of the few who saw it coming and did something about it.

**Your family's financial future depends on the decision you make today.**
