## Dear Valued Customer,

Hello, and thank you for your recent request for information regarding diversifying your retirement savings with physical gold and silver.

You're probably just as concerned as we are for America's economic future. For the first time in our proud nation's history, we're facing a future where our standard of living will decline compared to those who came before us. Our two-decade-plus national binge of deficit spending and multiple bubble-and-bust cycles of the stock market has created a financial dilemma for Americans who hope, one day, to stop working and enjoy their golden years.

The U.S. faces an absolute ocean of red ink, over \$30 trillion (and counting). That's money owed to global central banks, U.S. citizens, and future recipients of Social Security, just to name a few. We've seen the federal government bailout banks owned by other nations. We've seen the Federal Reserve conjure trillions of brand-new dollars out of thin air, nearly overnight! It's only a matter of time before the entire house of cards comes tumbling down before our government becomes financially bankrupt, dooming all our futures, and our children's futures as well.

We have a window of opportunity right now. To diversify our hard-earned money out of the inflated, increasingly-worthless U.S. dollar. To turn those pieces of paper, backed by nothing but hot air and vague promises to pay with real, physical assets we can hold in our hands.

My colleagues and I at American Alternative Assets have been working hard to educate everyday Americans just like you about the crucial importance of acquiring physical precious metals due to their intrinsic value. We want you to know the benefits of acquiring rare, highly-valued U.S. coins to diversify and protect your savings. I'm confident that, if you're given the facts, you will make the right decision. You will proudly join millions of your fellow Americans who own rare coins and precious metals.

Please take as much time as you need to review the enclosed materials. I know it's a lot to take in! And remember, at any time, my staff of professionals stands ready to make your experience enjoyable. We want to offer you the same level of white-glove service the world's billionaires get when they go shopping - while never losing sight of the critical protection that tangible items with intrinsic value can give your financial future.

If I can personally be of any additional service to you or your family, please give my office a call at (833) 656-4653. You have my commitment that our organization will make every effort to serve your needs with integrity and honesty.

Sincerely,  
Shanon Davis

**CEO, American Alternative Assets**

# THE DIFFERENCE WE ARE MAKING

***“Gold is money. Everything else is credit.”***

***\_J.P. Morgan***

The core of our company is directed at providing great opportunities for Americans to protect and diversify their retirement funds through physical precious metals. We provide valuable knowledge and every of our company’s decisions is tailored towards ensuring a smooth transition to your retirement plan.

## Our Mission

Our mission is to provide the best service through value of integrity, support, and knowledge to empower customers in making financially prudent decisions to attain their desired financial future and protect their savings.

## Our Values

We achieve this mission through values of hard work, customer centeredness, integrity, empathy, and efficiency. We support our customers through the whole process to enable them to understand all the available options for purchasing precious metals and guide them in choosing one that is best suited for their goals.

## Our Vision

To establish a network of financially secured American retirees through sustainable ownership of physical assets.

# HERE'S WHY WE ARE THE BEST

American Alternative Assets stands as the best in industry as we offer a time-proven track record of success in our service provision. We have a profile that projects values of integrity, empathy, and hard work dedicated to helping customers meet their needs.

## Simplicity

Our process is simple, easy to understand, and execute. Our customers trust us to make their retirement plans straightforward; hassle-free.

## Transparency

We understand the value of integrity and pride ourselves in being open with our customers. We build and sustain trust through an entirely transparent process. From the point of contact to the delivery of your metals, you can count on our fair and trustworthy service.

## Reliability

You can count on us to help you make the best choices. Through every step of the process, from lower prices to insured delivery we are always client-oriented. We have a track record of reliable customer service, something you can count on when safeguarding your future.

***The benefits of choosing us are innumerable. We have set a standard in the industry that remains to be matched. Our mission, vision, and values drive us to give customers the best value when making their retirement plans. Our service aims to establish trust—and to do it in the most honorable manner.***

# **INTRODUCTION: THE GLOBAL FINANCIAL SYSTEM AT A BREAKING POINT**

For decades, America has been getting the short end of the stick in global trade. While Wall Street and financial elites prospered, Main Street America has paid a devastating price.

Now, after years of being ignored, working Americans have reached their breaking point – and the world's financial system is about to feel the shock through what economists are calling "**The Mar-a-Lago Accord.**"

# 1. AMERICA'S GROWING DISCONTENT WITH THE CURRENT TRADE SYSTEM

The numbers don't lie. Since 2000, over 60,000 American factories have closed their doors forever. Empty manufacturing plants now stand as rusting monuments to a system that has failed ordinary Americans.

Manufacturing devastation has reached CRITICAL mass. In states like Ohio, Michigan, and Pennsylvania, once-thriving communities have been hollowed out. Over 2 million manufacturing jobs disappeared, with families forced to rely on government assistance or move away from homes where generations had built their lives.

Trump's explicit mandate to restructure global trade through the Mar-a-Lago Accord is no accident. His election victory wasn't just about politics – it was a direct response to the pain felt across America's industrial heartland. After decades of being told that cheap foreign imports and outsourced jobs were somehow "**good for the economy,**" Americans have delivered a clear verdict: the current system is BROKEN.

## 2. TRUMP'S REELECTION MEANS REAL POLICY CHANGE: THE MAR-A-LAGO ACCORD TAKES SHAPE

This time, it's different. Trump's return to the White House isn't just a continuation of his first term – **it represents something much more significant.**

This time with Republican control of government, there will be no congressional gridlock to water down these policies.

With both houses of Congress aligned, Trump has the political runway to implement the most significant overhaul of the global trading system since **World War II – the Mar-a-Lago Accord.**

Stephen Miran, Trump's nominee for the White House Council of Economic Advisers, and Scott Bessent, incoming Treasury Secretary, have both publicly discussed currency realignment as a cornerstone of Trump's economic strategy. **These aren't fringe ideas – they're the blueprint for America's economic future.**

The economic breaking point has arrived. The signs are everywhere for those paying attention. Central banks are stockpiling gold at record rates. BRICS nations are creating alternative payment systems to bypass the dollar. And with our national debt exceeding **\$37 TRILLION**, America can no longer afford to be the world's economic punching bag.

What happens next will reshape not just global markets, but your retirement security as well. Those who understand the Mar-a-Lago Accord – and position themselves accordingly – stand to protect and even grow their wealth during the coming turbulence. Those who ignore these warnings risk seeing decades of savings wiped out virtually overnight.

The restructuring of the global financial system isn't some distant possibility – it's already underway. The only question is whether YOUR retirement will survive the reset.

# THE DOLLAR'S DANGEROUS POSITION

Most Americans have no idea that the U.S. dollar's special status as the world's reserve currency is actually costing them their jobs, their communities, and their financial security. What financial experts call a "privilege" has become a burden that everyday Americans can no longer bear – a burden the Mar-a-Lago Accord aims to address.

## 01 THE "TRIFFIN DILEMMA" EXPLAINED FOR EVERYDAY AMERICANS

You don't need an economics degree to understand what's happening to your money. When the world uses the U.S. dollar for global trade and savings, it creates a trap that hurts working Americans.

**How reserve currency status FORCES trade deficits:** For other countries to get the dollars they need, America must constantly send dollars abroad. We do this by buying more from other countries than we sell to them – **creating a permanent trade deficit**. This isn't an accident or poor negotiating. It's built into the system when your currency is used by the entire world.

The "**hidden tax**" on American manufacturing is devastating. While economists call this an "**exorbitant privilege**," for working Americans it's more like an exorbitant burden. The costs show up in very real ways:

**Loss of 2+ million manufacturing jobs since 2000.** These weren't just jobs – they were careers that supported families and entire communities. The worker at a factory making **\$25** an hour with benefits didn't just lose a paycheck when that factory closed – **they lost their way of life**.

**Decimation** of middle America's industrial base. Drive through towns in Ohio, Michigan, or Pennsylvania and you'll see the real cost of our dollar policy: boarded-up storefronts, abandoned factories, declining schools, and communities ravaged by hopelessness and addiction. This isn't just economic theory – **it's the reality millions of Americans live with every day**.

## 02 THE DOLLAR'S ARTIFICIAL STRENGTH

The dollar isn't strong because our economy is healthy – **it's artificially inflated because other countries need it for trade and reserves**.

America now only **26% of global GDP vs. 40% in 1960s**. Our economic importance in the world has shrunk dramatically, yet our currency remains dominant. As the rest of the world grows faster than us, the burden of providing dollars gets heavier and heavier.

Why a "**strong dollar**" isn't always good for Americans. You've probably heard politicians brag about a "**strong dollar**" as if it's always positive. What they don't tell you is that an artificially strong dollar:

- Makes everything we produce more expensive for foreign buyers
- Makes foreign imports artificially cheap, undercutting American businesses
- Helps Wall Street financial firms while hurting Main Street manufacturing

## **03 THE INEVITABLE CORRECTION COMING: THE MAR-A-LAGO ACCORD**

No system built on imbalance can last forever. The signs of the coming dollar reset through the Mar-a-Lago Accord are everywhere for those willing to see them.

**Warning signs flashing RED throughout the system:**

- National debt exceeding **\$37 TRILLION** with no plan to repay it
- Foreign countries like China and Russia actively creating alternatives to the dollar
- Central banks worldwide buying gold at the **fastest pace in 55 years**
- BRICS nations establishing **new payment systems** that bypass the dollar
- Energy producers considering accepting currencies other than dollars for oil

The dollar's correction isn't a question of if, but when. The system has bent as far as it can without breaking. Trump's aggressive trade policies and the Mar-a-Lago Accord are likely to be the catalyst that finally forces a major realignment of the global financial system.

**The real question isn't whether this reset is coming** – it's whether your retirement savings will survive it. Those who understand what's happening and take action now will not only protect their wealth but potentially see enormous gains as the system rebalances.

# TRUMP'S ARSENAL: TOOLS TO RESHAPE THE GLOBAL ECONOMY THROUGH THE MAR-A-LAGO ACCORD

Donald Trump returned to the White House with something he didn't have during his first term: experience. He's tested his economic weapons, seen what works, and now has both the knowledge and political backing to use them at full force through the Mar-a-Lago Accord. Understanding these tools is crucial to protecting your wealth as these policies continue to unfold.

## CURRENCY POLICY SHIFTS: THE CORE OF THE MAR-A-LAGO ACCORD

If tariffs are Trump's first strike weapon, currency policy is his strategic nuclear option – potentially more powerful but also more volatile.

### a. Moving away from "strong dollar" policy

For decades, every administration publicly supported a "strong dollar" policy. Trump has ended this era. He understands that an artificially strong dollar has decimated American manufacturing and created unsustainable trade deficits.

In his own words: "I love a dollar that's not too strong... I mean, I've seen strong dollars and frankly, it's harder to compete."

### b. The Mar-a-Lago Accord - what it means for your money

Just as previous administrations orchestrated the Plaza Accord (1985) and Louvre Accord (1987) to adjust currency values, the Mar-a-Lago Accord will rewrite the rules of the global currency system. This would force America's trading partners to strengthen their currencies against the dollar.

#### Potential exchange rate adjustments of 15-20%

Economic experts project currency realignments of 15-20% or more under the Mar-a-Lago Accord, similar to previous coordinated currency interventions. This is not speculation. It's based on historical precedent and the stated goals of Trump's economic team.

# IMPACT ON YOUR PURCHASING POWER OVERNIGHT

When currency values shift through the Mar-a-Lago Accord, the effects are immediate and far-reaching:

- Dollar-denominated assets could lose significant value
- Imported goods suddenly become more expensive
- The purchasing power of your savings could drop dramatically
- Assets tied to other currencies or hard assets like gold could soar

These economic weapons are already being deployed, and their effects will reverberate through the global economy for years to come. **The question is no longer about what Trump will do** – it's about whether your portfolio is positioned to withstand the Mar-a-Lago Accord's sweeping changes.

# **GOLD AS A POTENTIAL SAFEGUARD DURING THE MAR-A-LAGO ACCORD**

Throughout history, gold has often played a distinctive role during periods of economic transformation. As currency policies and trade relationships evolve under the Mar-a-Lago Accord, understanding the historical performance of precious metals may offer valuable perspective for those concerned about preserving their purchasing power.

## **THE UNIQUE PROPERTIES OF GOLD IN CHANGING FINANCIAL LANDSCAPES**

Gold possesses several characteristics that have historically distinguished it from other assets during times of economic uncertainty:

### **Physical asset with inherent value:**

Unlike currencies that can be created through monetary policy, gold's supply grows at only about 1.5% per year. This limited supply has historically contrasted with the expansion of paper money supply during economic stress.

### **No counterparty risk:**

Physical gold doesn't depend on any institution's promise or performance. While stocks, bonds, and bank deposits involve counterparty obligations, physical gold exists independent of the financial system.

### **Universal recognition:**

For over 5,000 years, gold has been recognized and valued across virtually every civilization and culture, giving it a uniquely global acceptance that transcends political systems.

## **HISTORICAL PERFORMANCE DURING PREVIOUS CURRENCY ADJUSTMENTS**

While past performance never guarantees future results, gold's historical record during monetary transitions offers educational context for what might happen during the Mar-a-Lago Accord:

### **1971-1980 Period:**

When the dollar's link to gold was severed in 1971, the U.S. entered a decade of significant monetary uncertainty. During this period, gold rose from \$35 per ounce to over \$850 – a remarkable increase while many traditional investments struggled with inflation.

Those who included gold in their portfolios during this time often preserved purchasing power more effectively than those relying solely on paper assets.

### **2008-2011 Period:**

During the uncertainty following the 2008 financial crisis, gold increased from approximately \$750 to over \$1,900 per ounce. This 153% appreciation occurred while many other assets experienced significant volatility.

### **Recent Performance**

From 2018 to present, gold has shown resilience during various economic challenges, including trade tensions, pandemic disruptions, and inflation concerns.

## **CENTRAL BANK ACTIONS TELL A SIGNIFICANT STORY**

Perhaps the most telling indicator comes from the behavior of central banks worldwide:

- Central banks have been net buyers of gold for over a decade
- In recent years, this buying has accelerated dramatically
- Nations like China, Russia, Poland, Turkey, and India have substantially increased their gold reserves
- The U.S. maintains the world's largest official gold holdings (over 8,000 tons)

This raises an important question: If the institutions managing the world's currencies are accumulating gold at record rates, what might they understand about the coming Mar-a-Lago Accord that most Americans don't?

## **POTENTIAL BENEFITS FOR PORTFOLIO DIVERSIFICATION**

Financial experts often suggest considering gold for several potential purposes during currency shifts like the Mar-a-Lago Accord:

### **Potential Inflation Hedge:**

Historically, gold has often maintained purchasing power during inflationary periods when the value of currency declines.

### **Portfolio Diversification:**

Gold typically shows low correlation with stocks and bonds, potentially helping to reduce overall portfolio volatility.

## **Wealth Preservation:**

During currency realignments or geopolitical stress, gold has sometimes served as a store of value when paper assets face challenges.

## **Tax-Advantaged Options:**

For retirement planning, IRS-approved precious metals IRAs offer a way to potentially include gold with similar tax advantages as traditional retirement accounts.

# **IMPORTANT CONSIDERATIONS FOR POTENTIAL INVESTORS**

Anyone considering precious metals as protection against the Mar-a-Lago Accord should understand several key points:

- All investments carry risk, including gold, which can experience significant price fluctuations
- Precious metals typically don't provide income through interest or dividends
- Storage and insurance considerations apply to physical metals
- The appropriate allocation varies widely based on individual circumstances
- Gold is generally considered a long-term holding rather than a short-term trading vehicle

This information is provided for educational purposes only. A qualified financial professional can help determine if and how precious metals might fit within a diversified strategy based on your specific situation, goals, and risk tolerance.

# REAL DANGERS AND OPPORTUNITIES FOR YOUR RETIREMENT DURING THE MAR-A-LAGO ACCORD

When most Americans think about threats to their retirement security, they focus on the obvious: market crashes, job losses, or health emergencies. But there's a more insidious danger lurking in the financial system—one that could silently erode decades of careful saving without a single alarming headline: the currency shift coming with the Mar-a-Lago Accord.

## **01** HOW INFLATION DURING THE MAR-A-LAGO ACCORD CAN DESTROY FIXED INCOME

Inflation isn't just about paying more for groceries. During periods of currency realignment like the Mar-a-Lago Accord, it becomes a retirement killer, especially for those relying on fixed-income investments like bonds, CDs, and annuities.

### **The "safe" investments that could lose 30-50% in real terms**

Consider this sobering reality: During the 1970s inflation crisis, "safe" Treasury bonds lost nearly 40% of their purchasing power in just a few years. People who thought they were being conservative with their retirement funds watched helplessly as their savings effectively evaporated while maintaining the same nominal value.

Today's situation with the Mar-a-Lago Accord is potentially more dangerous. With government debt at unprecedented levels and monetary policy pushing the boundaries of financial experimentation, the stage is set for inflation that could make the 1970s look mild by comparison.

When currencies undergo realignment through initiatives like the Mar-a-Lago Accord, the resulting inflation doesn't just chip away at your purchasing power gradually. It can deliver a sudden, devastating blow to anyone holding assets denominated in the weakening currency.

**What good is a bond that pays 4% when real inflation is running at 15%?**

**What happens to your carefully calculated retirement income when it suddenly buys half of what you planned for?**

# 02

## HOW INFLATION DURING THE MAR-A-LAGO ACCORD CAN DESTROY FIXED INCOME

Facing these threats, prudent investors are turning to history's most reliable financial shield against currency realignments: physical precious metals. Gold and silver have preserved wealth through currency collapses, banking failures, and political upheavals for thousands of years.

### Physical Gold Vs. Paper Gold: Critical Differences

Not all gold investments are created equal. Understanding the difference between physical gold and various paper gold instruments could be the difference between genuine protection and false security during the Mar-a-Lago Accord.

### Why ETFs May FAIL During The Mar-A-Lago Accord Implementation

Gold ETFs are convenient, but they come with hidden risks. Most gold ETFs don't guarantee that your investment is backed by allocated physical gold. Instead, they operate through a system of promissory notes and derivatives that could unravel during a severe financial crisis.

When markets seize up as they did in 2008, the gap between the price of paper gold and physical gold can widen dramatically. During the most critical moments when you need your gold to perform during the Mar-a-Lago Accord, paper gold vehicles may fail to track the actual value of physical metal.

### The "Paper Gold" trap that could leave you with **NOTHING**

Beyond ETFs, many investors unwittingly hold "paper gold" through unallocated accounts, futures contracts, or gold certificates. These instruments typically involve multiple counterparties and complex legal structures that may not withstand a systemic financial crisis.

**Remember:** if you can't hold it, you don't own it. Paper claims on gold are only as good as the financial strength of the issuer. When that strength is tested in a crisis like the Mar-a-Lago Accord, these promises often prove worthless.

# 03

## HOW INFLATION DURING THE MAR-A-LAGO ACCORD CAN DESTROY FIXED INCOME

### A. Gold IRAs And Their Unique Benefits

#### i. Protection From Government Overreach

A properly structured Gold IRA places physical precious metals in a secure, IRS-approved depository while maintaining all the tax advantages of a retirement account. This arrangement provides a critical layer of protection against potential capital controls or confiscation measures that have historically accompanied currency crises.

By holding physical gold in an IRA structure, you're securing your wealth within a framework that the government has established and is therefore less likely to disrupt. This doesn't make your gold immune to changing regulations, but it does provide substantially more protection than holding gold in a bank safety deposit box or standard investment account.

#### ii. Tax-Deferred Growth Potential

Like traditional IRAs, Gold IRAs allow your investments to grow without immediate tax consequences. This tax deferral significantly enhances the compounding potential of your precious metals holdings.

**Consider this:** Gold has risen from approximately **\$35 per ounce in 1971 to over \$3,000 today**. That remarkable growth would have generated substantial tax liabilities in a standard investment account. In a Gold IRA, all of that appreciation occurs tax-deferred until distribution.

### B. How To Execute A Gold IRA Rollover

#### Simple 3-Step Process

Converting existing retirement assets to a Gold IRA to protect against the Mar-a-Lago Accord is surprisingly straightforward:

##### Step 1:

Open a self-directed IRA with a custodian specializing in precious metals

##### Step 2:

Transfer funds from your existing retirement account (this generates no tax consequences when done properly)

### **Step 3:**

Select IRS-approved precious metals for purchase and secure storage

The entire process typically takes 10–15 business days and can be handled largely through paperwork and phone calls, with expert guidance at each step.

### **Avoid Penalties And Taxes**

A properly executed Gold IRA rollover allows you to diversify your retirement holdings into physical precious metals without triggering taxes or early withdrawal penalties. This preserves your retirement nest egg while repositioning it for protection against currency turmoil from the Mar-a-Lago Accord.

## **WHY WAITING COULD BE COSTLY: THE IMMEDIATE ACTION PLAN**

The time to prepare for the Mar-a-Lago Accord is not when the crisis makes headlines—by then, it's often too late. The current window of opportunity may close quickly, leaving unprepared investors vulnerable.

### **Three steps to take this week to protect your wealth from the Mar-a-Lago Accord**

#### **A. Request Your Free Mar-A-Lago Accord Protection Kit**

Education is the first step toward protection. Our comprehensive Mar-a-Lago Accord Protection Kit provides detailed information about precious metals investing, current market conditions, and specific strategies for preserving wealth during currency realignment.

This free resource includes historical data on gold's performance during previous financial crises, guidance on selecting the right precious metals for your situation, and clear explanations of various investment options.

#### **B. Schedule Your Mar-A-Lago Accord Risk Assessment**

Understanding your specific vulnerabilities is crucial. Our team of experienced precious metals specialists can review your current investment holdings and identify which assets may be most exposed to currency risks from the Mar-a-Lago Accord.

This complimentary assessment includes an analysis of your retirement accounts, evaluation of your current precious metals allocation (if any), and customized recommendations based on your age, goals, and risk tolerance.

## C. Learn About IRA-Eligible Gold Options

Not all precious metals qualify for inclusion in a Gold IRA. The IRS has specific requirements regarding purity and form. Our specialists can guide you through these requirements, helping you select appropriate gold, silver, platinum, or palladium products for your retirement account.

Understanding these options before you begin the rollover process ensures you make informed decisions that maximize both protection and growth potential during the Mar-a-Lago Accord.

The world's central banks and governments are already preparing for the coming currency realignment. **The question is: Are you?**

# DON'T WAIT UNTIL IT'S TOO LATE

**History teaches us a crucial lesson:** financial protections are usually put in place before they're obviously needed. By the time the majority recognizes the danger of the Mar-a-Lago Accord, options are often severely limited.

### Remember:

- In 1933, Americans had no warning before gold ownership was suddenly criminalized overnight
- In 2008, many retirees lost 40-50% of their life savings while the well-prepared maintained their wealth
- In 2013, Cyprus implemented sudden bank account "haircuts," confiscating funds with no recourse

The window of opportunity to protect your wealth from the Mar-a-Lago Accord is rapidly closing. The time to secure your financial future is now, while you still have options.

**Call (833) 656 - 4653** today to schedule your complimentary consultation. Our specialists will listen to your concerns, answer your questions, and help you determine if physical precious metals are right for YOUR unique situation.

**No pressure. No sales tactics. Just honest guidance for uncertain times.**
