## Dear Valued Customer,

Hello, and thank you for your recent request for information regarding diversifying your retirement savings with physical gold and silver.

You're probably just as concerned as we are for America's economic future. For the first time in our proud nation's history, we're facing a future where our standard of living will decline compared to those who came before us. Our two-decade-plus national binge of deficit spending and multiple bubble-and-bust cycles of the stock market has created a financial dilemma for Americans who hope, one day, to stop working and enjoy their golden years.

The U.S. faces an absolute ocean of red ink, over \$30 trillion (and counting). That's money owed to global central banks, U.S. citizens, and future recipients of Social Security, just to name a few. We've seen the federal government bailout banks owned by other nations. We've seen the Federal Reserve conjure trillions of brand-new dollars out of thin air, nearly overnight! It's only a matter of time before the entire house of cards comes tumbling down before our government becomes financially bankrupt, dooming all our futures, and our children's futures as well.

We have a window of opportunity right now. To diversify our hard-earned money out of the inflated, increasingly-worthless U.S. dollar. To turn those pieces of paper, backed by nothing but hot air and vague promises to pay with real, physical assets we can hold in our hands.

My colleagues and I at American Alternative Assets have been working hard to educate everyday Americans just like you about the crucial importance of acquiring physical precious metals due to their intrinsic value. We want you to know the benefits of acquiring rare, highly-valued U.S. coins to diversify and protect your savings. I'm confident that, if you're given the facts, you will make the right decision. You will proudly join millions of your fellow Americans who own rare coins and precious metals.

Please take as much time as you need to review the enclosed materials. I know it's a lot to take in! And remember, at any time, my staff of professionals stands ready to make your experience enjoyable. We want to offer you the same level of white-glove service the world's billionaires get when they go shopping - while never losing sight of the critical protection that tangible items with intrinsic value can give your financial future.

If I can personally be of any additional service to you or your family, please give my office a call at (888) 732 - 9242. You have my commitment that our organization will make every effort to serve your needs with integrity and honesty.

Sincerely,

**CEO, American Alternative Assets**

# THE DIFFERENCE WE ARE MAKING

***“Gold is money. Everything else is credit.”***

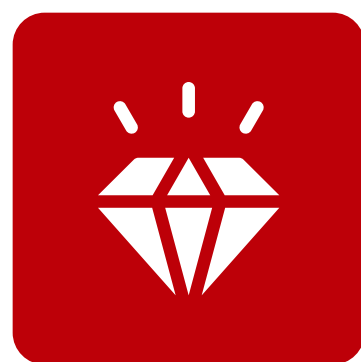

**\_J.P. Morgan**

The core of our company is directed at providing great opportunities for Americans to protect and diversify their retirement funds through physical precious metals. We provide valuable knowledge and every of our company’s decisions is tailored towards ensuring a smooth transition to your retirement plan.

## Our Mission

Our mission is to provide the best service through value of integrity, support, and knowledge to empower customers in making financially prudent decisions to attain their desired financial future and protect their savings.

## Our Values

We achieve this mission through values of hard work, customer centeredness, integrity, empathy, and efficiency. We support our customers through the whole process to enable them to understand all the available options for purchasing precious metals and guide them in choosing one that is best suited for their goals.

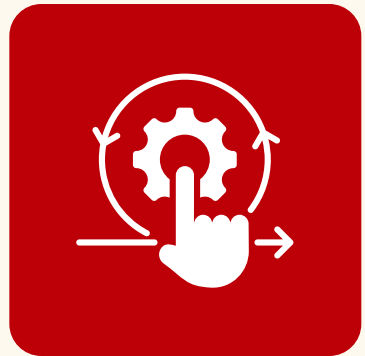

## Our Vision

To establish a network of financially secured American retirees through sustainable ownership of physical assets.

# HERE'S WHY WE ARE THE BEST

American Alternative Assets stands as the best in industry as we offer a time-proven track record of success in our service provision. We have a profile that projects values of integrity, empathy, and hard work dedicated to helping customers meet their needs.

## Simplicity

Our process is simple, easy to understand, and execute. Our customers trust us to make their retirement plans straightforward; hassle-free.

## Transparency

We understand the value of integrity and pride ourselves in being open with our customers. We build and sustain trust through an entirely transparent process. From the point of contact to the delivery of your metals, you can count on our fair and trustworthy service.

## Reliability

You can count on us to help you make the best choices. Through every step of the process, from lower prices to insured delivery we are always client-oriented. We have a track record of reliable customer service, something you can count on when safeguarding your future.

***The benefits of choosing us are innumerable. We have set a standard in the industry that remains to be matched. Our mission, vision, and values drive us to give customers the best value when making their retirement plans. Our service aims to establish trust—and to do it in the most honorable manner.***

*Why Smart Money Is Fleeing Dollars for Physical Gold*

## **THE SHOCKING DISCOVERY**

On August 1, 2025, the Federal Reserve published a report that should have been front-page news.

But the media ignored it. Politicians stayed silent.

*And most Americans still have no idea what it means for their savings.*

Here's what they admitted: The United States government owns **261.5 million** ounces of gold.

That's more gold than any other country on Earth.

But here's the shocking part:

The government pretends this gold is worth just **\$42.22 per ounce**. That's the official price set by a law from 1973. Meanwhile, gold actually sells for over **\$3,300 per ounce** today.

Do the math. That's a difference of **\$850 billion**.

Let that sink in. Your government is sitting on \$850 billion in hidden value. And they're lying about it.

But buried in the Federal Reserve report were 11 words that should terrify every American with savings. The report stated: "**Revaluation proceeds have been used when countries face exceptional fiscal circumstances.**"

**Translation:** When governments can't pay their bills, they revalue gold. And we can't pay our bills. Why does this matter to you?

Because when governments get desperate enough, they stop lying about their gold. They "**revalue**" it to the real price. And when that happens, something terrible happens to your dollars.

Think about it. If gold is suddenly worth 80 times more in dollars, what does that say about the value of those dollars?

Five countries have already done this. And every single time, **regular people got crushed**. Their savings lost massive value overnight. Their retirements were destroyed.

Now Congress is talking about doing it here. Senator Lummis from Wyoming has already introduced a bill. It's called S.4912. Look it up yourself if you don't believe me.

The clock is ticking. And most Americans have no idea what's coming.

## **THE 5-COUNTRY WARNING**

History doesn't repeat, but it sure does rhyme. And right now, it's rhyming with disaster.

Five countries have revalued their gold in the past 30 years. Let me tell you what happened to regular people each time.

**Germany tried it in 1997.** The government needed money to qualify for the Euro. They wanted to revalue their gold and use the profits. But the German people found out. There was an uproar. The central bank refused. The government backed down. Germans knew what this meant – their money was in trouble.

**Lebanon did it in 2002.** They revalued their gold to pay off government debt. It was worth 11% of their entire economy. Guess what? It didn't work. The currency collapsed anyway. People lost everything. Today, Lebanon is a failed state.

**Italy did it the same year.** They needed 13 billion euros to cover banking losses. So they revalued their gold. Italian savers paid the price through inflation.

**South Africa is doing it right now.** As you read this, they're using gold revaluation to cover their debt crisis. They need the money that badly. Watch what happens to their currency next. Here's the pattern: Governments only revalue gold when they're desperate. When they can't pay their bills. When they're out of options.

And friend, America is getting desperate.

Our national debt just hit **\$37 trillion**. We're adding **\$5 billion** more every single day. That's **\$59,000** every second. By the time you finish reading this sentence, we're another \$200,000 in debt.

The interest alone costs us \$880 billion a year. That's more than we spend on defense. More than Medicare.

**We can't pay it back. Everyone knows it. So what happens next?**

The same thing that always happens. The government will revalue gold to create money out of thin air. And your dollars will be worth a lot less.

## **THE PERFECT STORM BREWING**

Everything is lining up for a massive crisis. And it all points to one conclusion: The dollar is in deep trouble.

Let me show you:

### **The Debt Bomb Is About to Explode**

We owe **\$37 trillion**. But that's not the scary part. The scary part is how fast it's growing. In 2024 alone, we added **\$2 trillion**. That's never happened before in peacetime.

At this rate, we'll hit **\$40 trillion** before the next election.

The government spends **\$6.75 trillion** a year but only collects **\$5 trillion** in taxes. Where does the extra \$1.75 trillion come from? We borrow it. Every. Single. Year.

But here's the problem:

**Lebanon did it in 2002.** They revalued their gold to pay off government debt. It was worth 11% of their entire economy. Guess what? It didn't work. The currency collapsed anyway. People lost everything. Today, Lebanon is a failed state.

**Italy did it the same year.** They needed 13 billion euros to cover banking losses. So they revalued their gold. Italian savers paid the price through inflation.

**South Africa is doing it right now.** As you read this, they're using gold revaluation to cover their debt crisis. They need the money that badly. Watch what happens to their currency next. Here's the pattern: Governments only revalue gold when they're desperate. When they can't pay their bills. When they're out of options.

And friend, America is getting desperate.

Our national debt just hit **\$37 trillion**. We're adding **\$5 billion** more every single day. That's **\$59,000** every second. By the time you finish reading this sentence, we're another \$200,000 in debt.

The interest alone costs us \$880 billion a year. That's more than we spend on defense. More than Medicare.

**We can't pay it back. Everyone knows it. So what happens next?**

The same thing that always happens. The government will revalue gold to create money out of thin air. And your dollars will be worth a lot less.

## **THE PERFECT STORM BREWING**

Everything is lining up for a massive crisis. And it all points to one conclusion: The dollar is in deep trouble.

Let me show you:

### **The Debt Bomb Is About to Explode**

We owe **\$37 trillion**. But that's not the scary part. The scary part is how fast it's growing. In 2024 alone, we added **\$2 trillion**. That's never happened before in peacetime.

At this rate, we'll hit **\$40 trillion** before the next election.

The government spends **\$6.75 trillion** a year but only collects **\$5 trillion** in taxes. Where does the extra \$1.75 trillion come from? We borrow it. Every. Single. Year.

But here's the problem:

## NOBODY WANTS TO BUY OUR DEBT ANYMORE!

China used to be our biggest lender. Not anymore. They just dumped another **\$9.6 billion** in U.S. bonds last month. They're down to **\$759 billion** from over **\$1.3 trillion**.

Japan is selling too. They cut **\$27.3 billion** in December alone.

Foreign countries now own the smallest percentage of our debt in 22 years.

**So who's buying?** The Federal Reserve.

They're printing money to buy our own debt. That's like paying your Visa bill with your Mastercard. It never ends well.

Senator Cynthia Lummis didn't introduce that gold revaluation bill for fun.

She knows what's coming. The bill would force the government to revalue gold at market prices. It would create **\$850 billion** instantly. No new taxes. No spending cuts. Just change the price on paper.

Sounds like magic, right? It's not.

That **\$850 billion** comes from somewhere. It comes from

## THE VALUE OF YOUR DOLLARS!

**Remember 2008?** I do. The signs were everywhere if you knew where to look. Treasury auctions starting to fail. Banks hoarding cash. The Fed caught between inflation and recession.

**Sound familiar?** It should. It's all happening again. Right now.

But there's one huge difference. In 2008, we could still borrow our way out. We went from \$10 trillion in debt to **\$20 trillion**. We kicked the can down the road.

We can't do that again. We're already at **\$37 trillion**. There's no more road left.

When this breaks, it's could make 2008 look like a pleasant picnic.

# THE CENTRAL BANK GOLD RUSH

While you're reading this, something extraordinary is happening.

Central banks around the world are buying gold like crazy.

*And they're dumping dollars to do it.*

These aren't conspiracy theorists in bunkers. These are the people who run the world's money...

## AND THEY'RE SCARED!

Last year, central banks bought 1,045 tons of gold. That's over \$111 billion worth. It's the most they've bought since we went off the gold standard in 1971.

China is leading the charge. They added 60,000 ounces just last week. Officially, they own 2,285 tons now. But experts think it's really double that. They're buying so much, they're hiding it.

Poland hit their target of 20% of reserves in gold. The president said it makes Poland "**more credible.**" Think about that. He's saying gold is more credible than dollars.

India bought 73 tons. Turkey bought 75 tons. Every central bank that can afford it is loading up on gold.

### **But here's the real bombshell:**

The World Gold Council surveyed central banks this year. 73% said they plan to reduce their dollar holdings over the next five years. Let me repeat that. Nearly three-quarters of the world's central banks want fewer dollars.

The dollar used to be 71% of world reserves. Now it's down to 57%. And falling fast.

Meanwhile, 20% of oil is now sold without using dollars. Russia and China do 90% of their trade in rubles and yuan. Saudi Arabia, our old petrodollar partner, is setting up yuan accounts for oil sales.

The BRICS countries just launched their own payment system. It went live in October. They don't need dollars anymore.

These central banks know something big is coming. They're not buying gold because they think it's pretty. They're buying it because they know dollars are about to be worth a lot less.

When the people who create money are trading it for gold, what does that tell you?

# YOUR 2008 REDEMPTION OPPORTUNITY

I need to tell you something that might be hard to hear. But you need to hear it.

Remember 2008? Remember watching your 401(k) become a 201(k)? Remember the fear, the sleepless nights, the feeling that everything you worked for was disappearing?

The S&P 500 fell 37%. The average 401(k) lost 40-50%. Real estate crashed 31%.  
But gold? Gold went UP 25%.

**Here's the shocking math that proves it: If you had \$500,000 in stocks in 2008, you ended with \$315,000. But gold owners? They MADE money while everyone else panicked.**

Let me show you the exact numbers, because the math doesn't lie.

If you had \$500,000 in stocks in 2008, you ended up with \$315,000. You lost \$185,000.

But here's why moving just 15% of your savings could save your entire retirement—just like it did for thousands in 2008:

**If you had moved just 15% into gold?** You would have ended with \$444,000. That's \$129,000 more. Enough to make the difference between retiring or working another decade.

If you had 25% in gold? You actually would have made money while everyone else was panicking. This isn't theory. This is what actually happened.

Thousands of Americans who had just 15% in gold saved their entire retirement. They're the ones who retired on schedule. They're the ones who sleep soundly now.

Now let me tell you something even more important. The setup today is even better than 2008. Gold is already up 36% in the past year. The debt crisis is three times worse than 2008. And this time, there's no bailout coming. We're already broke.

And don't even mention silver.

Silver is poised to make a massive jump that could be the next "golden" opportunity.

There's a 118 million ounce supply deficit projected for 2025 - the biggest shortage in history.

Solar panels and electric vehicles are consuming silver faster than mines can produce it.

The gold-to-silver ratio is at 90:1, when historically it averages 60:1, meaning silver could jump 50% just to reach normal levels.

When gold moves, **silver typically moves twice as fast**. In 2008, gold gained 25% but silver gained 47%.

In 2008, the government could print \$4 trillion to save the banks. Today, we're already printing that much just to keep the lights on.

In 2008, China and Japan were still buying our debt. Today, they're selling.

In 2008, the dollar was still king. Today, countries are abandoning it.

I can't go back and fix 2008 for you.

*But I can help you prepare for what's coming next.*

This is your chance for redemption. Your chance to be on the right side of the biggest wealth transfer in history.

The people who owned gold in 2008 didn't just survive. They thrived. While their neighbors were losing everything, they were gaining wealth.

The same opportunity is here right now. But the window is closing.

## **THE WINDOW IS CLOSING**

I'm not trying to scare you. I'm trying to prepare you. Because once this starts, it will be too late. Here's the timeline as I see it:

The exact date Congress could vote to unlock \$850 billion in hidden gold value?

It could be when the Treasury runs out of "extraordinary measures."

Here are the 3 things you **MUST** do before Congress returns from recess:

### **First, calculate your real risk.**

Add up everything in stocks, bonds, and savings accounts. That's what's at risk when the dollar gets revalued. If you can't afford to lose 30-40% of it, you need protection now.

### **Second, understand your options.**

The IRS-approved method to own physical gold is through a Gold IRA.

Here's how it works in plain English:

If you have money sitting in a traditional IRA, Roth IRA, or old 401(k) from a previous employer, you can move that money into a Precious Metals IRA without paying any taxes or penalties. It's called a "rollover" or "transfer."

Think of it like moving money from one savings account to another at a different bank.

The IRS allows this as long as you follow their rules: the precious metals must be stored in an approved depository (not your house), and it must meet certain purity standards (99.5% pure for gold).

The entire process usually takes about 10-14 days.

You fill out some paperwork, the custodian handles the transfer, and then you choose which gold or silver to buy with your retirement funds.

You still own it, you can still sell it when you want, and it grows tax-free just like your regular IRA. When you retire and take distributions, the tax treatment is the same as your original IRA - traditional IRAs are taxed as regular income, Roth IRAs come out tax-free.

Once Congress starts debating, gold prices could spike. Premiums could explode.

The Federal Reserve faces its own impossible choice.

Save the dollar or save the stock market. They can't do both. History shows they always choose to save the banks. Always.

Three things will force their hand:

First, when debt hits \$40 trillion. At the current pace, that's 18 months away. Maybe less.

Second, when a Treasury auction completely fails. Not just weak demand. A complete failure. It's already starting. Foreign buyers are walking away.

Third, when oil producers fully abandon the dollar. We're already at 20%. When it hits 50%, game over.

Here's what happens when everyone realizes the dollar is in trouble:

Gold prices spike overnight. Not 5% or 10%. More like 50% in a matter of days.

In 2008, people were paying 20% over spot price just to get physical gold. And they were happy to pay it.

Availability disappears. Dealers run out. The U.S. Mint stops selling. Three-month waiting lists become common.

By the time your brother-in-law is talking about buying gold, it's too late.

By the time it's on the evening news, it's too late.

By the time everyone "knows" they need gold, you won't be able to get it.

The smart money isn't waiting. Central banks aren't waiting. Billionaires aren't waiting. Should you?

## **YOUR NEXT STEP**

Let me be completely honest with you.

Precious metals aren't for everyone.

If you need income from your investments today, gold isn't right for you. Gold doesn't pay dividends.

If you have less than \$50,000 saved for retirement, focus on saving more first.

If you're looking to get rich quick, look somewhere else. Gold is insurance, not a lottery ticket.

If you don't have an emergency fund, build that first. Gold is for protecting wealth, not for emergencies.

But gold might be right for you if:

You have retirement savings that you can't afford to lose. You've worked too hard to watch it disappear in a crisis.

You're worried about government debt and money printing. You see the writing on the wall. You want to sleep soundly at night, knowing your wealth is protected. Peace of mind is worth more than a few extra percentage points of gain.

You can hold for the long term. Gold is not a day-trading vehicle.

You value protecting what you have over chasing the next hot stock.

## HERE'S WHAT WE CAN DO FOR YOU

At American Alternative Assets, we've helped thousands of Americans protect their retirement savings with physical gold and silver.

We're real people who care about your financial security. And with an A+ Rating from the Better Business Bureau, you can rest assured that you're in good hands.

We offer a free consultation to qualified investors. No high pressure. No gimmicks. Just honest conversation about your situation and whether precious metals make sense for you.

During your consultation, we'll discuss:

- How much of your portfolio should be in precious metals (it's probably less than you think)
- The difference between physical gold and paper gold (ETFs)
- How Gold IRAs work and their tax advantages
- Storage and insurance options
- Current prices and market conditions

We'll also send you our free "**2008 Hedge Calculator**." It shows exactly how much gold would have saved you in the last crash.

More importantly, it shows how much it could save you in the next one.

### **But We Can't Help Everyone**

We only work with serious investors who qualify. We turn away more people than we accept. That's how we maintain our quality of service.

To see if you qualify for a consultation, call us at:

**(888) 732 - 9242**

Our specialists are available Monday through Friday, 8 AM to 6 PM Eastern.

The government has an \$850 billion secret. Central banks are dumping dollars for gold. The national debt is exploding. All the warning signs are flashing red.

You can ignore them. Or you can act.

But remember what happened to the people who "waited for more information" in 2008. They lost 40-50% while gold owners made 25%.

Don't let history repeat itself.

**Call (888) 732 - 9242 now.**

Your retirement depends on it.
